

A Photo Booth for your Wedding

The Wedding Photo Booth combines the sentimentality of the Traditional Coney Island Photo booth with modern technology to provide your guests with numerous features & options from which to select.

Guests receive a print out of their 4 images taken within the sit-down photo

booth. Unlike the traditional photo booth, guests can choose prior to printing to have the print out in old fashioned black & white or in color. Additionally, guests can decide to have the print out vertically or horizontally. Lastly, with each print out comes two strips so when multiple guests pile into the photo booth they will each receive one print out. This is a great feature for those who are considering using a scrap book for their wedding.

There are numerous additional features that are offered with this photo booth. All of the images from your event can be stored and thus provided post event.

Software can be customized for logos and messages and the exterior of the booth can be customized as well (Additional Charge).

For those who want more, this booth also offers other features to play such as providing different hairstyles and fashions. With all this flexibility, this photo booth is the choice for many events & parties.
